

CSCE 190 Team Elderberry Problem Statement

Problem Statement: *“Our single parent has been hit hard by COVID-19 and is struggling to be able to provide food for her kid and does not know much about cooking and how to do it cheap. Our solution aims to be able to allow them the ability to search meals based on what ingredients they already have and suggests cheap meals that can be made with minimal ingredients that will last along time.”*

Who is experiencing the problem? *“Many people have been affected financially by COVID, our target is to help those who don’t know how to cook.”*

What is the problem? *“Many people are on very tight budgets and many do not know how to cook cheap and with less perishable food.”*

Where does the problem present itself? *“The problem is evident all across America, as well as, across the globe.”*

Why does it matter? *“If people do not budget well they could end up evicted or not being able to feed themselves. If they learn how to cook and can optimize what food they buy, they will be able to cut their food budget dramatically.”*
